Advance Notice of Infrastructure Works - Commencing Late November 2016 ERA Water: Waterproofing Eastern Adelaide Project

Waterproofing Eastern Adelaide is an important initiative being delivered by ERA Water, a subsidiary of the Town of Walkerville (ToW), City of Norwood Payneham & St Peters (NPSP) and the City of Burnside (CoB). These councils have been working together since 2009 in the planning and delivery of the project.

The Water Proofing Eastern Adelaide Project is supported through funding of \$9,500,000 (GST exclusive) from the Australian Government's National Urban Water and Desalination Plan and funding of \$2,000,000 (GST exclusive) from the Adelaide and Mount Lofty Ranges Natural Resources Management Board. The project involves the construction of an Aquifer Storage and Recovery (ASR) Scheme to harvest, treat, store and distribute recycled stormwater for the irrigation of parks, reserves and schools within the Eastern Region of Adelaide. The project will:

- Yield up to 494ML/a of treated stormwater
- Construct approximately 42 km of distribution network across the eastern Adelaide region to service irrigation demand replacing potable water
- Improve water security for eastern Adelaide
- Generate a net benefit to water quality in the River Torrens by reducing pollutant loads discharged into the river

ERA Water has appointed a contractor to construct an underground pump station at Drage Reserve in Felixstow (refer to attached map). Works will commence in late November 2016 and finish in April 2017.

The infrastructure at Drage Reserve will play a crucial role in enabling water to be pumped around the pipeline network for the irrigation of parks, reserves and schools within the area.

Construction sites will be fenced off for safety and noise levels will be in accordance with the EPA legislation and guidelines. Work hours will be between 7am and 5pm, Monday to Friday. Signage will be present at each of the sites with contact numbers for the project info line for the duration of the works.

Local traffic management arrangements will be in place throughout the works to ensure a safe work site. Our Site Supervisor will coordinate access which will be off Briar Road.

We apologise for any inconvenience that the proposed works may cause, and ask for your patience whilst they are carried out.

If you have any questions regarding the pipeline installation works, please do not hesitate to **contact** the project team on 1300 309 660.

For more information or to register for project updates, visit the project website at era.sa.gov.au
